Recruiter Candidate Analysis Report

Rank	Candidate	ATS	Skill Match	Recommendation
1	resume_Datascience.pdf	77.0	80.0%	■ Recommend
2	resume_saroj_roche (3).pdf	63.0	70.0%	■ Consider
3	resume_saroj.pdf	63.0	70.0%	■ Consider

1. resume_Datascience.pdf

ATS Score: 77.0

Recommendation: ■ Recommend

Matched Skills

AWS, Git, Machine Learning, NumPy, Pandas, Python, SQL, Scikit-learn

Missing Skills

Data Visualization, GCP

AI Summary

****1. Candidate Strengths:****

Saroj possesses exceptional Python, ML, Generative AI, and SQL skills, directly aligning with the job's healthcare analytics focus. Their "Healthcare Analytics Dashboard" project demonstrates practical experience with structured data, Power BI, and relevant libraries. Strong proficiency in Pandas, NumPy, Scikit-learn, LLMs, Git, and AWS further enhances their profile, along with excellent academic performance and project-based experience.

****2. Candidate Weaknesses:****

The primary weakness is the candidate's expected graduation in May 2027, making them a pre-final year student for a "graduate" role. Formal work experience beyond hackathon participation is also limited.

****3. Hiring Recommendation:****

Highly recommend Saroj for an interview. Despite being a pre-final year student, their robust projects and strong technical alignment with all key and preferred skills make them an outstanding candidate. Explore the possibility of an internship or a full-time role post-graduation.

2. resume_saroj_roche (3).pdf

ATS Score: 63.0

Recommendation: ■ Consider

Matched Skills

Data Visualization, Git, Machine Learning, NumPy, Pandas, Python, SQL

Missing Skills

AWS, GCP, Scikit-learn

AI Summary

****Candidate Strengths:****

Saroj exhibits strong foundational skills in Python, SQL, ML, and data visualization, with projects directly aligned with healthcare analytics and LLMs, matching preferred job requirements. Their academic record is excellent, and soft skills like problem-solving and collaboration are present.

****Candidate Weaknesses:****

The primary weakness is the expected graduation date of May 2027, which does not meet the "graduate" prerequisite for this full-time role. Missing explicit mention of Scikit-learn, cloud platforms (AWS, GCP), and detailed model deployment experience are also noted.

****Hiring Recommendation:****

****Reject for this graduate Data Scientist position.**** The candidate's current student status (expected May 2027) is a fundamental mismatch for a role requiring a graduate. Consider for future internship opportunities.

3. resume_saroj.pdf

ATS Score: 63.0

Recommendation: ■ Consider

Matched Skills

Data Visualization, Git, Machine Learning, NumPy, Pandas, Python, SQL

Missing Skills

AWS, GCP, Scikit-learn

AI Summary

****1. Candidate Strengths:****

Saroj exhibits strong Python, SQL, ML, NLP, and LLM skills, evidenced by impressive projects like FinPath AI using Llama-3. Their academic record is excellent, and they possess relevant data visualization, Git experience, and critical problem-solving skills. The candidate also matches the Hyderabad location.

****2. Candidate Weaknesses:****

The primary weakness is not meeting the "graduate" qualification, with an expected graduation in May 2027. The resume also lacks explicit mention of Scikit-learn, cloud platforms (AWS/GCP), and specific healthcare domain experience.

****3. Hiring Recommendation:****

Do not recommend for this specific Data Scientist role, as the candidate is not yet a graduate as required. While highly skilled for an undergraduate, they don't meet a fundamental qualification. Consider for future internship opportunities or post-graduation roles.
